

Dear {PARTICIPANT}

Thank you for participating in the **Gateway to Health** Program, a cervical cancer education and intervention project. We hope you found the program to be helpful and informative.

Six months have been passed since you attended the education workshop on \_\_\_\_\_ at \_\_\_\_\_. As described in the program, it is important to get regular screening for cervical cancer (for example, a Pap smear test), even if you have no symptoms. If you have already been screened, that's great! You have taken an important step for yourself and your family.

If you have not had screening yet, please call your doctor or healthcare provider and schedule an appointment to obtain your Pap smear. If you need help in finding a doctor, a screening site or need other assistance, please call us at \_\_\_\_\_.

Sincerely,
